Watch St. Louis.

The Greatest World's Fair the world has ever seen will be held at St. Louis in 1904. To keep in touch with the work of preparation for this great World's Fair and to get all the news of all the earth, every reading person should at once subscribe for the great newspaper of st. Louis, the Globe-Democrat. It stands pre-eminent and alone among American newspapers, and acknowledges no equal or rival. Its circulation extends to every state and territory of the Union. to Canada and Mexico, and to every part of the world where there are readers of the English language. It ought to be in your home during the coming year. See advertisement elsewhere in this issue. | 746 watts. Mineral Plant.

Within the last year an industry of much importance to American paint manufacturers and dealers has sprung manufacturers and dealers has sprung into existence near Malaga, Spain. A rich vein of oxide of iron ore, known as hematite-valuable chiefly for the manufacture of red paint for structural iron work-has been developed. The production of hematite in the United States has been falling off in spite of an increasing demand.

Possible Heir to Throne.

Dr. R. T. Styll, of Newport News, Va., who has been traveling in England, claims to have discovered that in the slightly improbable event of the house of Stuart being restored to the British throne during the life of Capt. J. E. B. Stuart, that gentleman would be legal successor to the place now occupied by King Edward. Capt. Stuart is the only son of the noted confederate cavalry ST. VITUS'DANGE Sure Cure. Circular. Formalin and the Blood. Extended and painstaking experiments with formalin injections in animals suffering from inoculated septicemia in the laboratory of the New York health department show conclusively that formalin, the recently vaunted cure for blood poisoning, is more injurious to the normal blood cells than to the bacteria whose products are poisoning the blood.

Loud Talkers.

The College Gazette soundly berates the Germans for their loud talking and noisy conduct in general hotels and elsewhere. It declares that they have come to be known in Italy, Switzerland and other countries frequented by tourists as "the noisy nation," and that it is chiefly on their account that the builders of hotels are being compelled to make sound-proof doors and walls.

London's Water Bill. London has a water bill which is not paid to the water company. The casual statement was made in the house of com-

mons the other night that London paid annually not less than \$150,000 for water which had been put in the milk it drank. The quantity of milk received into London every day is approximately 144,000 gallons, which retails at 4d a quart. The rate of adulteration is 15.2. Frog Weighed Five Pounds.

The World Almanac and THE SENTS

On His "Harvest Moon." Senator Bailey, of Texas, tells of a young friend of his who recently marmied a woman of 50. She is rich and plain; he is handsome and poor. The day after the wedding Mr. Bailey met them on a train. "The groom," says the senator, "went into the smoking compartment with me and we lighted up. He smoked gloomily. He was silent a long while. 'Well, Jack,' I said, 'so this is your honeymoon, eh?' He smiled grimly. 'Don't call it my honeymoon,' he said. 'It's the harvest moon with me."

Teaches Household Science. About 100 young women are students at the Colorado State agricultural college at Boulder. The course of study pursued by them includes sanitary science, home nursing, scientific cooking, chemistry and biology. The course was designed to fit women for home duties

or to furnish teachers of domestic science, but we cannot supply the calls

for teachers, says Theodosia Ammons,

dean of women at the college, "for our

graduates all get married."

All the Gold in the World. The total gold production of the world from the discovery of America by Columbus to the year 1900 is, according to the report of the United States mint, in round numbers, \$9,-811,000,000. Pure gold of this value would weigh about 16,272 tons, and occupy a space equal to 27,039 cubic feet. Graphically this amount could be represented by a solid circular tower of gold 20 feet in diameter and

Authors and Authoresses

86 feet high.

The wife of an author is less obscure than the husband of an authoress, in the very nature of the case. For an author, being almost always poor, probably has more children than can lean against him, in his photographs, with artistic effect, and thus his wife has to be brought out into the limelight. Whereas, an authoress has seldom or never to cope with exigencies of this character.

Educated Indians.

The oft-printed statement that educated Indians, soon after leaving school SILICON relapse to the "blanket" state is refuted by the report of the Hampton Institute. That school has graduated 938 Indian boys and girls, 673 of whom are now living. The report shows the work of these alumni to be excellent in 141 cases; good in 333; fair in 149; poor in 42; bad in 8.

"After my first baby was born I did not seem to regain my strength although the doctor gave me a tonic which he considered very superior, but instead of getting better I grow weaker every day. My husband insisted that I take Wine of Cardul for a week and see what it would do for me. I did take the medicine and was very grateful to find my strength and health slowly returning. In two weeks I was out of bed and in a month I was able to take up my usual duties. I am very enthusiastic in its praise."

Wine of Cardui reinforces the organs of generation for the ordeal of preg-nancy and childbirth. It prevents mis-carriage. No woman who takes Wine of Cardui need fear the coming of her child. If Mrs. Unrath had taken Wine of Cardui before her baby came she would not have been weakened as she was. Her rapid recovery should commend this great remedy to ever expectant mother. Wine of Cardu regulates the menstrual flow.
